

Entering New Medication Into Skyward *Includes Dosage Units and Reasons Dose Not Given*

Note: Before entering any new medication, please review the current list of medications to avoid creating duplicates. Please also follow the 3 digit capital letter code and appropriate short and long descriptions.

1. Click on **Office** and click **Setup** next to *Medications*.
2. Now click on **Codes**

3. To add a new type of medication, choose **Medication Types**.

To add additional Dosage Units, choose **Medication Dosage Units**

To add additional reasons for dose not given, choose **Medication Reasons Dose Not Given**

4. Once chosen, simply click **Add** to add additional types, dosage units, or reasons and fill out the required information.

Medication Type Codes

Views: **General** Filters: ***Skyward Default**
